**ADDRESS:** San Joaquin Valley APCD

**SUBJECT:** Status of Avenal

**COMMENTS:**

Errol called to update the status of the Avenal application. Notwithstanding the Applicant's claims that the SJVAPCD has "reinstated" the Avenal Project application, the District does not agree with that conclusion. The current status of the application for the Avenal Project is incomplete, as the District suspended the application many years ago when the project went dormant. Back then, Duke requested an extension of the application suspension, and the District denied that request, deeming the application as incomplete. That status has not changed since the District has not received an application from the Applicant to deal with any incompleteness issues (such as BACT).

Also Errol mentioned that if the CEC keeps the original AFC application number (01-AFC-20) then the District would keep the same application number to them (C1011324). However, if the CEC chooses to re-issue a new AFC application number, the SJVAPCD will require that the application be given a new application number.
