Subject: PEC Evidentiary hearing

CC: Arlene Ichien; JAMCKINSEY@stoel.com; Mafoster@stoel.com

Mr. Kramer, Staff has had a chance to review the water conservation program proposed by the PEC and the relevant exhibits and testimony. Based on this new information staff will be supplementing its testimony and believes that the issue of water use is no longer in controversy. It is anticipated staff and PEC will be able to develop appropriate levels of verification of water savings through the Westland conservation programs. Therefore staff will not be filing a brief on Water and Soil.

During the prehearing conference PEC indicated a desire for clarification of the appropriate building code this project will fall under. Staff will be preparing an errata to testimony indicating the 2007 building codes will apply. With this clarification there is no longer a controversy and not further briefing will be necessary on this issue.

Jared
