**Subject:** Panoche Gas line problem  
**Attachments:** Panoche Energy Center Pro DescFig 1.pdf; Panoche Energy Center Pro DescFig 3.pdf

**CC:** Jared Babula

Staff is trying to work through the gas pipeline issue. The problem is that the applicant took the pipeline they now want to use (south of the substation), off the table in their response to data request #29, and consequently we did not perform any environmental analysis on it, only the Panoche Road routes, north side and south side in the public right-of-way.

Additionally, the AFC says throughout, that PG&E would install, own, operate and maintain the pipeline. This info is contained in AFC paragraphs 1.2.3, 3.7, 3.7.1 (modified by DR 29), 3.9.4, and 4.5. Additionally, Figures 3.2-1 and 3.4-1 (modified by DR 29 response) show the routes. The two figures are attached.

We will have a Condition of Certification available tomorrow. The data response info is below:

**TECHNICAL AREA: CULTURAL RESOURCES**

**Data Request 29 Rev:**

Please provide a map showing both proposed natural gas pipeline routes and a detailed description (with depth and width measurements) for the alternate route.

**Response:**

The primary route that will be used for the natural gas pipeline is described in PEC AFC Section 3.7.1 and shown on Figure 3.2-1. The only alternate is if the line may be installed on the north side of Panoche Road instead of the south side. The alternative route that was originally shown in the AFC Figure 3.4-1 will not be used by PG&E.

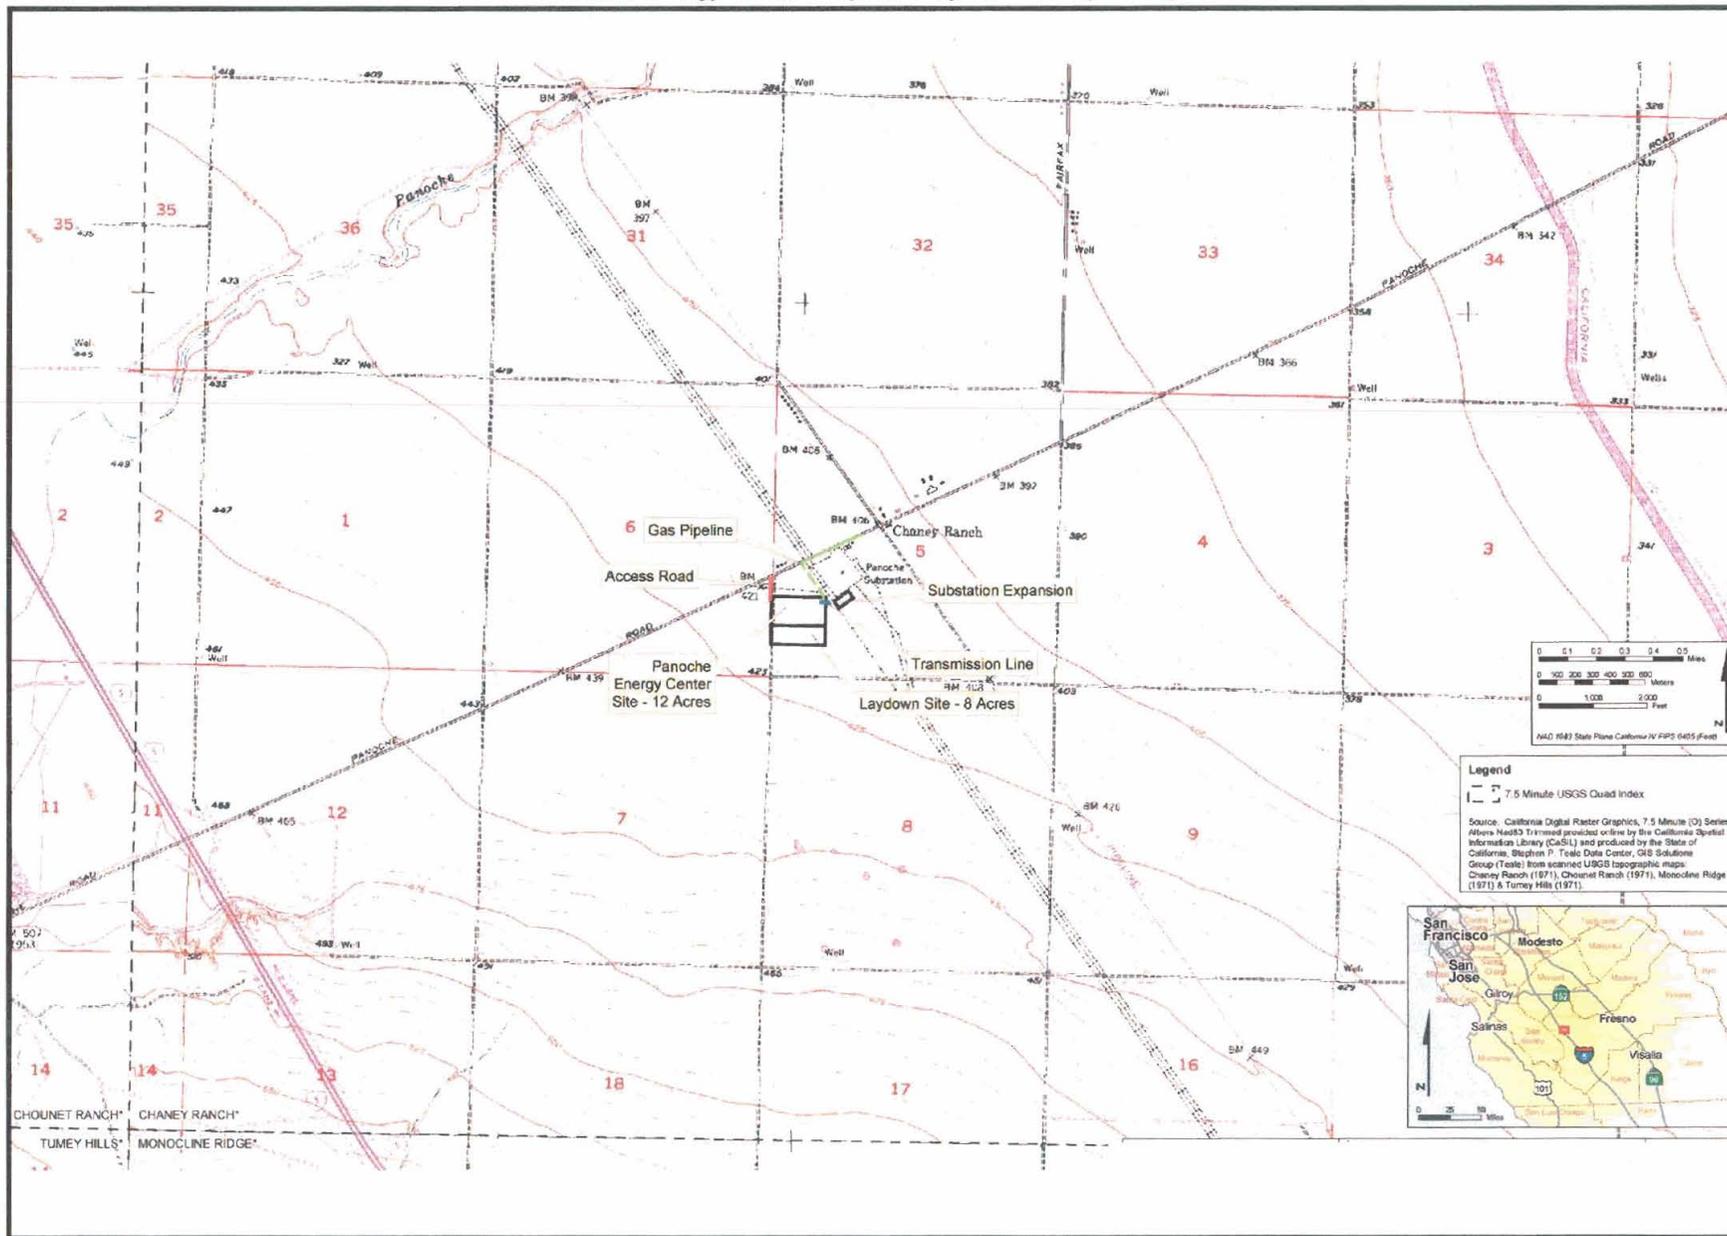

The pipeline trench is expected to be 18 inches wide and 48 inches deep.
