Date: 3/15/2009 5:08 PM
Subject: docket no. 07-afc-4

I live in the southwest Chula Vista region and first learned of the CVEUP about a year ago. At first I was a little angry at what I thought to be a "NIMBY" protest of the location of the peaker type power plant. I decided to go to the MMC facility and look around for myself. I walked around the site and learned that there were a number of houses (including one historically designated house) in the immediate area. I began to realize that all the families in this area had good reason to not want this project so near to them. The importance of a steady power supply does not trump the rights of the citizens that have lived in the neighborhood for many years. This upgrade should only be allowed away from homes in an area specified for power plants and other industrial uses. I wholeheartedly congratulate and thank Mr. James Boyd, the presiding member, for his decision to recommend denial of this project. We can and must all work together to ensure a safe and reliable supply of energy but this plan is very wrong at this location.

Thank You
David P. Danciu
