PROOF OF SERVICE (REVISED 2/5/08) FILED WITH
ORIGINAL MAILED FROM SACRAMENTO ON 3/14/08

Background

On September 14, 2007, Carlsbad Energy Center, LLC, submitted an Application for Certification (AFC) seeking approval from the Energy Commission to construct and operate the Carlsbad Energy Center Project (CECP), a 558 megawatt (MW) combined-cycle generating facility to be located in the city of Carlsbad, in San Diego County. On October 31, 2007, the Energy Commission accepted the AFC as complete which initiated the Energy Commission staff's independent review of the proposed project. The proposed project site is an approximately 23-acre parcel within the 30-acre tank farm associated with the existing Encina Power Station. The Energy Commission is responsible for reviewing and deciding whether to approve applications for thermal power plants with a generating capacity of 50 MW or greater proposed for construction in California.
