**Subject:** NRG West power plant

---

As a concerned resident of Carlsbad, Ca I'd like to let you know that I am against the proposed changes to the NRG West power plant in Carlsbad.

Please find a better place in a more industrial area to do that project.

Regards,  
Paul Knepper

---

I am a Carlsbad resident, directly affected by the proposed power plant. I live on Agua Hedionda Lagoon. This is so disturbing on so many levels. Can someone please email or call me with the dates of meetings in Sacramento? I will cancel everything to attend.

We own property that is directly affected by this. 10M dollars , maybe more.

We were told when we bought it that the power plant was getting torn down. No one ever mentioned the existing power plant staying and an even larger one being added.

In addition to this disturbing news, we already have to deal with Poseidon, and the environmentally compromised disaster that's going to be.

Why don't we just drain the lagoon, cement it up, we can park our big 'ol SUV's and revv them up, burn some coal and kill all the birds and wildlife.

Because that will be the end result. How could you even consider this?

I need a voice in this. Please respond.

**Subject:** carlsbad purposed new power plant

Vote NO. There are so many other places to put this... it is unbelievable you are purposing a even bigger polluter, and eye sore. Our city does not want it and even has other sites offered. How about the marine base, do the power plant. There would be no views to block or noise and pollution to the home owners and desalination plant so they both could be guarded against terror. Thank you

I am a long-time resident of Carlsbad, Ca and am very concerned about the power plant changes being proposed at the Encina Power Station on Carlsbad Blvd. I am opposed to this project and wish to provide input and remain informed of meetings or decisions being made. Please notify me at this e-mail address of any information regarding this project.

Thank you,

To whom it may concern,

As residents of Carlsbad for over 14 years, we are supporters of the new proposed power plant on the land West of I-5.

We are disappointed in the City of Carlsbad sending residents information that is biased against the proposed power plant. We feel that the City should not bias it's residents in their responses to your agency. The information sent to it's citizens should be neutral and the citizens should be able to comment without influence.

The expensive mailer suggests that another location in Carlsbad is an option. That is never going to happen. Residents of other sections of the City would never allow a power plant to be built in their area! Also, there is very little undisturbed open space left. What is left is environmentally sensitive and wouldn't support a power plant, nor would the residents in those areas support a power plant.

The present site is a great site. It has had a power plant for about 50 years. It has been there as long as most of the residents of Carlsbad. You would be adding a power plant to site that is already industrial and already has the existing infrastructure and an existing power plant.

We need to take responsibility for our use of electricity and build the new power plant where it is proposed.

Thank you,

Mark Peterson
