Subject: Encina Power Plant in Carlsbad CA

California Energy Commission -

I recommend you do not allow NRG West to build a new second power plant on the property where the current Encina Power Plant is located (near Carlsbad Boulevard and Cannon Road). The new power plant will not use water for cooling, so there is no need to locate it on the coast. The City of Carlsbad has proposed alternate sites for the power plant that I think you should consider. The Carlsbad Boulevard and Cannon Road location is a valuable piece of coastal land that would be better used for other purposes, as proposed by the City of Carlsbad. If you would like further input on my position, please let me know.

Thank you,

Doug Olson
