Gentlemen:

Re: Proposed NRG Power Plant

I am writing to express my opposition to the building of the proposed NRG power plant here in Carlsbad, California. As a long-time resident of this city, I believe that we citizens should be the final deciders as to whether this visual and environmental blight should be built along our beautiful coastline. Even though the California Coastal Commission will not oppose this project it cannot be denied that this plant will spew hundreds of thousands of greenhouse gases into our environment as well as being a visual eyesore for miles.

Undoubtedly there is money and politics at work here, and I know the state is looking for money anywhere it can get it. However I urge you to consider placing this plant and one of several other proposed sites.

Sincerely,

TERESA LARSEN
