Docket No. 07-AFC-6

To whom it may concern,

As a resident of Carlsbad I wish to express my opposition to the proposed power plant on our coastline. The current power plant is not only a blemish to our beautiful coast, but is an environmental and health hazard as well. To increase the number of plants would only amplify the current problems. As well, Carlsbad should not look like an industrial city especially in this day and age when the future is to use alternate sources of power/energy. I am certainly not alone when I say that I will put my house on the market the day this project is approved. I love the city of Carlsbad, but I will not put my children at risk to the additional pollutants this project will cause. Nor does a prosperous city like Carlsbad deserve to have such an unsightly coastline.

I sincerely hope the sentiments of the city of Carlsbad as well as its citizens are taken into serious consideration before approving this project.

Sincerely,

Mary & John Gieson
