Re: Application for Certification for the Carlsbad Energy Center Project

Docket No, 07-AFC-6

We oppose this project. We do not live near the site but are fiercely protective of all populated coastal property. We lived in San Luis Obispo and Don worked at the Diablo Power Plant. You can not see it from land. It is completely isolated on land that was zoned open space.

As Will Rogers said, "They ain't making property like this anymore."

We have lived in 10 other states and 3 foreign countries with varied climates. Carlsbad is blessed with the **best year round climate** that beacons the world. The **ocean** and **coast** are its' greatest **irreplaceable** assets. It is unfathomable to consider building this power plant here on this precious, heavily populated property, especially when the city will cooperate with finding another more appropriate industrial location. Just because the power plant has been there for 40+ years does not make it right for the next 40 years. Hopefully we have advanced in design and technology and learned from the past what not to do.

Putting profits before people is wrong. Please balance the long term effects to the total population. We do not even use heat or air conditioning throughout the year. This is a no brainer. Do the right thing.

Thank you.
