DOCKET	
07-AFC-6	
DATE	FEB 20 2010
RECD.	FEB 22 2010

Subject: Docket No. 07-AFC-6. (AKA Carlsbad Energy Center Project)

Dear Commissioners:

As a resident of Carlsbad since 1994, I am writing to strongly urge you to reject the NRG's proposal for a 550 mega-watt power plant to be erected on the same property as the Encina Power Station. Here are just a few of the reasons to reject this insane idea:

- Not a proper use of Coastal property
- Health risk of 10 fold increase in pollutants
- Fire Safety
- No contract with SDG&E
- Visual impact to the coastline
- Harm to tourism industry
- Environmental concerns

I cannot fathom the reasoning for believing this is an appropriate location for the power plant and have to wonder what forces are really at work behind this project.

Again, please consider the strong opposition by Carlsbad residents to this project when you make your determination.

Sincerely,

Donna and John Fenn
