RECD. FEB 22 2010

Energy Commission Docket Unit
Docket No. 07-AFC-6
1516 Ninth Street, MS-4
Sacramento, CA 95814

Dear Commissioners:

The City of Carlsbad is ignoring the simple fact that the City itself adopted the plans that allow the proposed project. Additionally, the project is a significant improvement to land use at the site: it begins the retreat of power generation away from the coast.

I am in favor of the proposed project. But what really matters is that the City does not have a leg to stand on in its opposition. The power project is an authorized use that complies with Carlsbad's applicable standards. For all of their rhetoric, the City cannot point at a single instance where the proposed project fails to comply with an ordinance or land use plan or zoning requirement.

So whether I like it or not, NRG has a right to build the proposed project. And I do like it!

Thank you for your consideration.
