California Energy Commission
Public Comment Testimony
Carlsbad Hilton Garden Inn

Dear Commissioners:

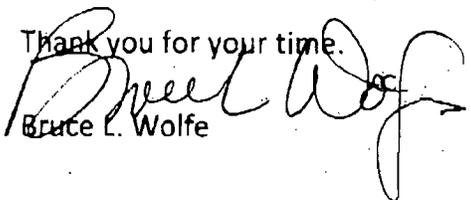

I am a resident of Carlsbad with a view of the Carlsbad Energy Center Project from my home. I am in support of the project.

While I am unable to attend the hearing I am hoping that my comments will be read into the record.

I became a supporter of the project approximately one year ago when I took a tour of the property. After touring the site, I realized that the construction of the new NRG facility and Poseidon water facility on this location will be a benefit to the City of Carlsbad as well as all users of electricity and water in Southern California. The land and location seem logical. I see no genuine conflicts with any adjacent property uses, including the freeway which cries out for improvements in horizontal and vertical alignment notwithstanding the NRG proposal. Additionally, the plant will be well buffered from the I-5 with significant landscape improvements.

The eventual result of NRG's efforts in Carlsbad will facilitate the availability of a large coastal property for development with limitless possibilities. The city of Carlsbad and its citizens with concern for the future of Carlsbad should be supportive of this project. I urge your support of this project.

Thank you for your time.

Bruce L. Wolfe
