REFERENCE: Docket 07-AFC-06
Carlsbad Energy Center Power Plant Licensing Case

I want to voice my strongest objection to the planned Carlsbad power plant at the Carlsbad coast line next to the present power plant between Interstate 5 and the beach.

1. There is no need for ocean water for cooling.
2. The city of Carlsbad already has a non-coastal site planned for this project.
3. Most of all, our coastline and our environment there will be unnecessarily affected for years to come.

Sincerely,
Edward S. Yeung
