We are long-time (over 40 years) residents of Carlsbad and strongly feel that building such an unsightly project on this beautiful piece of property would be a travesty, especially since other less obtrusive sites are readily available. The present power plant has long been considered an eyesore and the local community has hoped to be rid of it in the past. When they built a taller stack previously, there was much disappointment and criticism. Now, they propose building an even larger plant with more stacks!!!! It's totally unacceptable.
