TO: California Energy Commission  
RE: CARLSBAD ENERGY PROJECT DOCKET # 07-AFC-06

Please take the long view of how to best serve the needs of your constituency and do not pander to the short sighted, but expedient demand of NRG to locate a plant close to the existing power infrastructure. Approving this plan will result in the further destruction of a magnificent California asset - our coast line.

There is no compelling reason to build a new power plan in the currently proposed location. There are a multitude of reasons to locate it elsewhere, all of which have been presented to the Energy Commission by the City of Carlsbad.

Please use your authority to preserve the fragile beauty of our coast not to destroy it.

Thank you for your thoughtful consideration of a decision the could haunt all of us for the next century.

Sincerely,

Dr. Bill Odom
