Re: Docket 07-AFC-06 – Carlsbad Energy Project

just say NO to NRG proposed new power plant in Carlsbad.

With the proposed site situated between the I-5 Freeway and the train tracks, WHY would the citizens/tax payers of California want a new power plant built on a heavily congested traffic corridor between Los Angeles and San Diego? It's an accident waiting to happen.

Since new power plants are no longer cooled by water, there's no need to build a plant at the Coast. Build it inland in a non-residential area.

Or

Why build today with current -- outdated technology – offered by NRG? New technology makes the size of the proposed plant look like a dinosaur! New technology is smarter, smaller!!

Plans for the new plant do NOT include tearing down the old plant. Now there will be 3 stacks to blight the coastline.

just say NO to proposed NRG power plant in Carlsbad....

Thank You,

A. Reysbergen
Citizen of California
Taxpayer of California
