

Public Comment for the proposed Carlsbad Energy Center Power Plant

I would like to make the following written comment to be part of the record of this hearing. I understand that my comments will be posted on the web and be available to the public.

Governor's mandate for clean energy for Californians will not be served by a Natural GAS facility unnecessarily located on our precious coastline, and not even to be used by us if built. Carlsbad has generously and wisely offered an alternative location - please be forward thinking and wise in your decision - and decline this location for a new plant!
