

It is my understanding that your office is tasked with deciding whether the proposed NRG power plant in Carlsbad should move forward. As a Carlsbad resident and homeowner, I respectfully urge you NOT to approve the project. It would defy logic to approve the placement of another power plant along our beautiful and desirable California coastline. It is my understanding that ocean water will not be used to cool the plant. Why then would you build the plant on a location that serves such important and irreplaceable visual, recreational, and ecological uses for the City of Carlsbad. Furthermore, adding insult to injury, the power will not even be used to benefit the people of Carlsbad or San Diego. In 2012, with the technology to build plants anywhere in the County, it is unacceptable to approve this nightmare of a project and I assure you I will be rallying support from my neighbors. This environmental consultant/mother of two/Carlsbad homeowner will not sit idly by and allow this atrocity to happen.

Sincerely,
Sarah Vosovic
