Subject: **COMMUNITY POWER PROJECT (07-AFC-7) STATUS REPORT #3**

Pursuant to the Committee Scheduling Order dated January 18, 2008, the following is Energy Commission staff's Status Report #3 for the proposed Community Power Project (CPP).

Staff has been working through the analysis phase of the Application for Certification (AFC) process for the proposed CPP.

- The applicant states they intend to file an AFC Supplement B in July 2008, which will include minor transmission line reroutes and a new 60-acre construction staging area. The Alternatives Level Analysis of the PG&E transmission line reconductoring (response to Data Request #52) and Phase I Environmental Site Assessment (ESA) for the natural gas and water pipeline routes will also be submitted at that time.
- The applicant has not responded fully to Round #1 Data Requests, filed on January 23, 2008. Data Requests are still outstanding for Biology, Cultural Resources, Land Use, Waste Management, and Water Resources. Biological, Cultural, and Hazardous Waste surveys and studies are still in progress. The remaining data responses are expected to be filed before or concurrent with the applicant's submission of AFC Supplement B in early July 2008.
- Staff anticipates that a second round of data requests will be needed to facilitate the evaluation of proposed project changes, reconductoring analysis, and Phase I ESA.

Other Coordination Activities

- The applicant is currently in negotiations to acquire the necessary emission reduction credits. Staff has yet to receive an estimated filing date from the San Joaquin Valley Air Pollution Control District (SJVAPCD) for the Preliminary Determination of Compliance (PDOC).
