Dear Lieutenant Green:

We would like to thank and commend Sergeant Hester and Officer Olson for their attendance and participation at the California Energy Commission's (CEC's) public meeting and workshop for the Carrizo Energy Solar Farm Project that was held on Tuesday, August 5, 2008.

As the lead regulatory agency for this project, we strive to address and resolve community concerns about the project. Given the layout of State Route 58 and the amount of truck traffic the project would create, local community members are very concerned about traffic safety during construction. Sergeant Hester and Officer Olson spoke with individual community members and addressed the group as a whole and provided very useful input on several issues including traffic safety, pilot cars, CHP escorts, and other protocols. Their participation in Tuesday's meeting provided information that will assist us with our analysis and helped illustrate to the community that the CEC takes community concerns seriously and is collaborating with the appropriate agencies.

We greatly appreciate your staff's time and cooperation on this project.

Sincerely,

John Kessler
Project Manager
