**SUBJECT:** Issuance of an Air Pollution Control District Authority to Construct for a Diesel Engine Powered Standby Fire Water Pump at Carrizo Energy Solar Farm, San Luis Obispo County.

Dear Mr. Fontana:

Enclosed you will find an Air Pollution Control District Authority to Construct authorizing installation of a diesel engine powered standby fire water pump. This action is being taken in response to your application number 4510 received by us on October 29, 2007. You will note that certain conditions have been placed upon your Authority to Construct. Condition numbers 2 through 12 will be operating conditions in your San Luis Obispo County Air Pollution Control District Permit to Operate after installation of the engine is complete.

Pursuant to Rule 202 of the District's Rules and Regulations, this Authority to Construct shall expire and the application shall be canceled one (1) year from the date of issuance, if unused. As per District Rule 208, appeals to District actions on permits may be made in writing to the Hearing Board within thirty (30) days of receipt of the permit. Contact this office at the completion of construction so that an engineering inspection of your facility may be scheduled.

Also enclosed is an Authority to Construct fee invoice in the amount of \$796.53. The filing fee submitted with your application was credited to your account and reduced the amount now due. Please make your check payable to the San Luis Obispo County Air Pollution Control District and pay this amount within thirty (30) calendar days of the invoice date to keep your Authority to Construct valid. If you have any questions, feel free to contact Brian Auger at this office at (805) 781-5912.

Very truly yours,

LARRY R. ALLEN  
Air Pollution Control Officer

GARY E. WILLEY  
Manager, Engineering Division
