Report: Cultural Resources Survey of Section 27, TWP. 29 S. Range 19 E., San Luis Obispo, California:

Standards for Archaeological research have been refined over the past 25 years, and perhaps this area should be revisited.

Same report: page 3; paragraph 3:

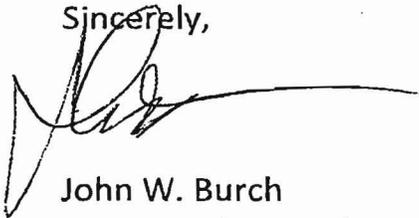

No Archaeological research has been conducted to discover sites buried in this area see page 5 of this report.

Same report: page 6: replace paragraph with: Obsidian biface and chert flake artifacts [appendix I plate 1 page 11] are considered important highly significant to the Salinan people.

On 12 May 2008 we asked to be intervenor on this project, what has happened to that request?

Thank you for your attention to this matter,

Sincerely,

John W. Burch  
Traditional Council Lead
