Subject: Fwd: Re: Carrizo - Disposition of roads in Laydown Area following Construction

Here is clarification from the Carrizo applicant that they do plan to maintain roads within the Laydown Area after construction.

Docket Staff - Please docket this email to Carrizo (07-AFC-8) and include the phrase in the file name, "Carrizo - Disposition of roads in Laydown Area following Construction"

Thanks,

John

John,
The entire laydown area will be restored to it's original condition, as feasible, except the roads. The laydown area roads will provide easy turn-off access and staging for truck and other project-related vehicle activity during construction, operations and maintenance of the project. These roads will also help lessen traffic impacts to SR-58 by getting truck traffic off the road when it reaches the site and will also help minimize delays to local traffic.

Hope that helps clarify. Let me know if you have any further questions or need further clarification.

 Subject
 Carrizo - Disposition of
 roads in Laydown Area
 following Construction

Hi Angela, Perry and Kristen:

We are trying to address PSA comments from CURE and SLO County regarding the disposition of the access roads within the Laydown Area following construction. Will the roads be removed and this sub-area within the overall laydown be restored to its natural state as we understand is the case for all other sub-areas of the laydown? I have looked in the AFC and AFC Supplement, and was unable to find clarification on this issue. Perhaps you already addressed this in a Data Request, and if that is the case, could you direct me to which one?

Thank you,

John
