Hi John,

URS's sound responses regarding my home need immediate attention. One of the most urgent issues that need to be addressed is the picture of the sound monitoring device (figure 2 facing north). This is a cut and paste picture (see attached picture). This is another display of dishonesty by URS and Ausra. Cutting and pasting pictures in a document is fraud and can be subject to legal action. I am very angry by URS's blatant display of dishonesty. Magic photography A++++ URS. URS first tells me they did noise measurements on my house pad. I voiced my concerns about URS trespassing and now these measurements are supposedly on my property line to the south. This is another farce by URS. My road is a private drive and is 30ft on my property. I have a county parcel map to prove this is private property and is posted. So URS still is trespassing according to their fake picture. I would now like to file a formal trespassing complaint against URS. URS states in response 23 there were no construction crews present during noise tests. This is untrue. I had concrete crews onsite on both the 3 and 4th of June. I additionally do not appreciate URS calling me a liar in regards to my construction crews. This is my home and I know exactly what is going on here. According to URS's noise sheets Attachment 1 noise was monitored on 6/3 at 15:15-16:00 for only 45 minutes by individual S.S. Who is S.S? Who does he work for? What are his qualifications? Another fine example of URS honesty. Noise measurement Data for 6/3 at 12:30-1:15 does not show what project or parcel this is even for. Furthermore it does not show who did this test. The same goes for Data from 6/4. Why did it take 5 months for URS to respond? URS never did any sound tests at my home and all information submitted is a lie including their falsified picture. After these findings URS's noise tests should not even be considered in the FSA. I am requesting this letter be docketed so all concerned parties can see the lack of honesty displayed by URS and Ausra.

Thank you for your timely response,
Mike Strobridge
