Hi Mike:

Sorry that I could not respond earlier. First, we do understand the severity of the noise issue, and I hope our PSA analysis and our actions including conducting an independent noise survey demonstrates our appreciation of the issue. Second, we are looking at options for how you and others will be able to offer comments on the Noise Mitigation Plan and our analysis of it for the FSA. Certainly, as soon as the document lands with us and is available on the web, you can review and provide comments. In addition, we are looking at ways that our updated analysis will be made available for comments.

Thank you for your ongoing contributions to the process, as well as alerting us to any of your concerns.

Sincerely,

John

John,

I would like to see Ausra,s noise mitigation plan before it is released in the FSA. My family will be impacted by the Noise Pollution from the CESF more than any other resident and being only 2800ft from the CESF you can understand my concerns for the well being of my family. I believe I have the right to review and comment on the noise mitigation plan that will be submitted by URS/Ausra before it is released in the FSA. If released in the FSA before I have a chance to review the mitigation plan;it is after the fact and does not give me adequate time to voice my concerns and protect my family. I do not understand how the CEC issued the PSA without all the information related to noise;such as a noise mitigation plan. How am I suppose to debate the mitigation issues before the FSA? The mitigation is what is suppose to limit my noise and is probably one of the most important things to me and my family. URS has displayed their dishonesty over and over again. I insist on seeing these mitigation measures before the FSA. It seems to me that the CEC is skipping a step in the review process on noise mitigation and is not giving the public a chance to comment on noise mitigation measures before the FSA. Noise pollution from the CESF will have an enormous effect on the quality of life for my family. I hope the CEC understands this.

Thank you,
Michael Strobridge
