

Mr. Jeffrey Byron
Commissioner, California Energy Commission
1519 9th Street
Sacramento CA 95814

Commissioner Jeffrey Byron,

On behalf of the Anaheim Chamber of Commerce, representing the Anaheim business community, I would like to express our support for the Canyon Power Project. Anaheim has over 14,000 businesses with over 170,000 employees who will all benefit from the Canyon Power Project.

The Canyon Power Project will improve upon the City's ability to provide reliable power to all Anaheim residents and businesses, thus insuring uninterrupted business practices during times of peak power demand. Additionally, with the Canyon Power Project online, Anaheim Public Utilities will continue to provide businesses with reliable service and rates that are the lowest in the region.

With reliability in mind, this project will be an asset that many new, and well established, businesses will consider when choosing a new location to conduct daily business activities. The City of Anaheim is continuing to grow, attract new businesses and bring additional visitors to Anaheim on an annual basis. The Canyon Power Project is a necessary addition to ensure the successful implementation of the City's vision for growth.

The Chamber also supports Anaheim's continuing investments in green power, in order to reduce our overall dependency on coal as a means to generate electricity. We understand that the Canyon Power Plant is critical to supply the backup power needed so that Anaheim can buy more green power, while not risking reliability as a result.

I would like to thank you for the opportunity to express the Anaheim business community's support for the Canyon Power Project. We welcome the opportunity to support this endeavor and look forward to assisting the City in making this project a reality.

Sincerely,

Todd Ament
President/CEO
Anaheim Chamber of Commerce
