Subject: Comments to the June 24, 2009 Final Determination of Compliance (FDOC) for Canyon Power Plant, Facility I.D. 153992.

Dear Ms. Lee:

The City of Anaheim has reviewed the above referenced FDOC and has a comment regarding Condition D82.2. This condition requires that the RATA testing of the NOx CEMS be completed no later than 90 days from initial startup of each gas turbine. In our comments on the PDOC we requested that this be changed to 90 days from the end of the commissioning period for each gas turbine to perform the RATA and submit the RATA report to the SCAQMD. We are again requesting a change to this condition due to the following:

- The timing is restrictive in that commissioning could take more than a month for a gas turbine (for example 45 days) and getting a RATA test report back from the test firm could take 45 days which leaves little time to resolve potential issues with commissioning and/or RATA testing.

Therefore, we are requesting some minor flexibility in this condition to be changed to 90 days from end of commissioning period (rather than 90 days from initial startup) for each gas turbine to perform the RATA and submit the RATA report to the SCAQMD.

If you have any questions or would like to discuss, I can be reached at 714-765-4112.

Sincerely,

Suzanne Wilson
